

Pullman

Desk

About Pullman Desk

The Pullman Desk is a single-user freestanding desk with an upholstered plinth base. The work surface provides a space for focused work or a quiet retreat without distractions in open plan spaces—from busy offices to university communal areas. The wall panels, upholstered body, and foam construction help to provide a level of acoustic comfort needed for concentration. Designed to fit in with the Pullman product family, and complement naughtone chairs and stools, the Pullman Desk maintains visual cohesion across the floorplate.

Choose from an array of attractive colours, finishes, and fabrics to tailor the Pullman Desk to your unique environment. The desk features power and data integration, including a cable zipper sleeve for discrete cable management, and can accommodate a clamp mount monitor arm.

Compliance

- SCS Indoor Advantage™ Gold Certificate
- FSC® certified products available upon request
- naughtone is FISP and ISO14001 certified

Desk Pod

About Pullman Desk Pod

An extension of the Pullman Desk, the Pullman Desk Pod provides a space for focused work or a quiet retreat without distractions in open plan spaces— from busy offices to university communal areas. This single-user desk pod with an upholstered plinth base boasts extra panels to create an almost full enclosure. Designed to coordinate with the Pullman product family, and complement naughtone chairs and stools, the Pullman Desk Pod adds visual cohesion across the floorplate.

Choose from an array of attractive colours, finishes, and fabrics to tailor to your unique environment. The desk pod features power and data integration, including a cable zipper sleeve for discrete cable management, and can accommodate a clamp mount monitor arm.

Pullman Desk Technical Specifications

Testing

Our seating is designed to meet or exceed all EN performance requirements per **EN16139:2013**, which includes the following tests:

- Seat and back static load test
- Seat front edge static load test
- Vertical static load on back
- Foot rest and leg rest static load test
- Arm sideways static load test
- Arm downwards static load test
- Vertical upwards static load on arm rests
- Seat and back durability test
- Seat front edge durability test
- Leg forward static load test
- Leg sideways static load test
- Seat impact test
- Back impact test
- Arm impact test

Flammability

The cold cure foam material has been tested to meet the following standards:

British standard
5852:2006 Part 2

California Technical Bulletin
117-2013

Italian standards
UNI 9175-CLASS 1.IM

The flammability standard of the covering fabric is dependent on the choice made by the customer, details of the flammability rating of specific fabrics can be found on supplier's websites listed below.

Measuring Guide

1 Design

Every aspect of the naughtone product ranges has been designed with the environment considered, from ethical material choice and production efficacy to storage efficiency and ease of disassembly.

Dense foam sets and resilient fabrics are selected for their longevity and effectiveness across sectors. Durable high quality finishes such as powder coated bases in a range of colours allow clients the freedom of finish options. Finish samples are available allowing clients to make informed decisions and retain to add to their finish libraries for future reference.

2 Raw Material

Local supply of raw materials is employed for the production of our products when possible, procured from suppliers that are quality inspected for extraction methods and meet the highest environmental standards.

3 Production

As many of our products are assembled by hand the energy expenditure wasted from machinery during the production process is kept to a minimum.

All fabrics are cut to ensure optimum efficiency with fabric usage and reduced waste consumption per unit.

All production sites have recycling facilities for any excess product that cannot be used elsewhere, which is then managed by a professional third party.

4 Distribution

Distribution of naughtone products generally occurs directly between the manufacturing site to the client. Production is localised when possible to the US or UK regions, reducing the carbon footprint and miles travelled for each product.

Many items are flat packed for delivery or shipped disassembled with efficient, minimised packaging; optimizing the transportation vessel space.

5 Usage

naughtone products do not require energy or water to function, thus no environmental exchange takes place and no waste is generated during the life of the product.

The only foreseeable need is the cleaning of the product for general maintenance. This includes regular vacuuming to remove dirt and dust particles on upholstery items, and using a dry or damp cloth to wipe non-upholstery items.

This is recommended for all products utilised under conditions of normal wear and is expected to have negligible environmental impacts.

6 End of Life

Although our products are durable and demonstrate timeless design, naughtone products are manufactured in such a way that they can be easily disassembled at the end of life and most of the componentry can be either recycled or re-used as applicable.

As a company we are also happy to accept the return of products, to help re-home or recycle furniture or components at the end of the products useful life.
